THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:
**Purdue University Agricultural Experiment Station
and A.R.S., U.S. D.A.**

Whereas, THERE HAS BEEN PRESENTED TO THE
Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF *seventeen* YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, [THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM.] TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS CLASS OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

3. GENUS AND SPECIES NAME <u>Avena sativa</u>	4. FAMILY NAME (Botanical) Gramineae	FILING DATE 2-11-74	TIME 3:00 P.M.		
	5. DATE OF DETERMINATION JUNE 1, 1973	FEE RECEIVED \$-750.00	CHARGES		
6. NAME OF APPLICANT(S) Purdue University Agricultural Experiment Station	7. ADDRESS (Street and No. or R.F.D. No., City, State, and ZIP Code) Agricultural Experiment Station Purdue University West Lafayette, Indiana 47907	8. TELEPHONE AREA CODE AND NUMBER 317-749-2461			
9. IF THE NAMED APPLICANT IS NOT A PERSON, FORM OF ORGANIZATION: (Corporation, partnership, association, etc.) Division of Land Grant University B. J. LISKA	10. STATE OF INCORPORATION Established by Federal Law Hatch Act 1889	11. DATE OF INCORPORATION 1889			
12. Name and mailing address of applicant representative(s), if any, to serve in this application and receive all papers: Dr. H. H. Kramer, Director Agricultural Experiment Station Purdue University West Lafayette, Indiana 47907					
13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:					

- ☒ 12A. Exhibit A, Origin and Breeding History of the Variety (See Section 52, P.L. 91-577)
- ☒ 12B. Exhibit B, Botanical Description of the Variety
- ☒ 12C. Exhibit C, Objective Description of the Variety (Official form not available.)
- ☒ 12D. Exhibit D, Data Indicative of Novelty
- ☐ 12E. Exhibit E, Statement of the Basis of Applicant's Ownership

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable. (See Section 52, P.L. 91-577).

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? (See Section 83(a), P.L. 91-577) (If "Yes," answer 14B and 14C below.) ☒ YES ☐ NO

14B. Does the applicant(s) specify that this variety be limited as to number of generations? ☒ YES ☐ NO

14C. If "Yes," to 14B, how many generations of production beyond breeder seed?
Three

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act (P.L. 91-577).

(SIGNATURE OF APPLICANT)

EMA. Exhibit A. Origin and Breeding History of Noble.

Noble was developed at the Purdue University, Lafayette, Indiana, Oat Breeding Station in cooperation with the Agricultural Research Service, United States Department of Agriculture.

Noble is a uniquely high-yielding, strong-strawed variety. It resulted from a complex combination of 10 different parents in a series of 14 crosses. It derived straw strength from Tippecanoe, resistance to yellow dwarf virus from CI7676, Albion and Putnam 61 and limited rust resistance from Clintland 64. The detailed parentage of Noble is:

Tippecanoe/14/CI7676/13/Putnam*5/Minn313/12/Putnam*5/Tippecanoe/
10/Minhafer/9/Mo-O-205/8/Clinton*7/Landhafer/7/Clinton*7/
Landhafer/2/Clinton*7/Landhafer/6/Clinton*7/Landhafer/4/T. 1.
2105/3/Clinton/2/Boone/Cartier/5/Clinton*7/Landhafer/4/T. 1.
2120/3/Clinton/2/Boone/Cartier/11/Putnam*5/Minn313(Purdue 571)*
2/2/Albion.

Noble was developed using a modified pedigree breeding program. The final selection was made in the F_4 progeny of an F_3 plant following the final cross. Breeder seed was in the F_{11} generation in 1972.

Spontaneous fatuoid types of Noble occur at a frequency of less than 0.01 percent.

Groat protein content of Noble is moderately high (17.5 to 18.5% subject to environment and fertility level).

Noble has good resistance to lodging and straw breakage after ripening. It is resistant to races of loose smut currently prevalent in Indiana and is moderately resistant to the yellow dwarf virus. It has limited resistance to crown rust and stem rust being susceptible to current predominant races.

Noble has been tested in nursery plots at Lafayette. It was grown for six years, in Indiana state field plots for four years and in the Uniform Midseason Oat Performance Nursery for three years.

It is recognized that oats (Avena sativa) are nearly self-pollinated. Stability of Noble is indicated in that during the first 10 increase generations, aberrant types for plant height, color, etc. The dwarf virus resistance and smut resistance did not occur. The breeder seed increase field in 1972 showed no variant plant types as certified by Indiana state inspection.

00002

12. B. Exhibit B. Botanical Description of Noble

Noble is a spring oat, Avena sativa L.

The coleoptile is white (lacks pigment).

Culms are generally erect, although they bow somewhat at the base. They are resistant to node bending as described in Agron. J. 49:518-519. The flagleaf is generally upright. The first leaf below the flagleaf is generally drooping. Leaf margins are glabrous. Culms are yellow. The diameter of the uppermost node is 4.0 mm whereas that of Tippecanoe is 3.5 mm. Ligules are very prominent and wrap tightly around the culm. Average first leaf below flag leaf width, panicle width and panicle length of Noble are 16.9 mm, 8.0 cm, and 12.5 cm, respectively.

The panicle form is equilateral, branches are short and ascending and arise at the lower rachis node. The rachis is flexuous. Awns are few or absent with a length of 0-17 mm and are short and straight. Outer glumes, stems and leaves ripen to a picturesque harvest yellow. The lemma is brownish-yellow, and does not fluoresce. The length of the lemma averages 12.0 mm, the lemma extends 2 to 3 mm beyond the groat. Grains are distinctly short and plump, well-filled, and have a relatively low percentage of hull. Weight of 1000 kernels is generally 30 to 31 grams and test weight is generally 34 to 36 pounds per bushel at Lafayette, Indiana.

40612

Data Indicative of Novelty

Noble most closely resembles Tippecanoe, one of its parents.

Noble is novel in that:

It is moderately resistant to the yellow dwarf virus disease whereas Tippecanoe is intolerant. It possesses unusually high yielding ability and has excellent resistance to lodging. Noble has placed at or near the top of nursery tests for yield and lodging resistance (Table 1). Noble is one to two days later, two inches shorter, yields 15% more than, and has a 7% larger kernel weight than Tippecanoe. It is recognized that varieties respond differentially to seasonal variation in temperature and planting date.

Table 1. Lafayette Advanced Yield Nursery, 4 replications, 6-year average, 1968-1973.

Variety	Yield, Bu/A	T. W., lb/bu	1000 - Ker. Wt., g	Pre-ripe Straw Score*	Headed June	Height, Inches	% Groat Protein
Noble	134.0	34.6	30.2	4.1	13.8	35.2	16.9

In reply refer to:
FSA 91-0445

Dear Mr. Shezille:

We have information that on or about March 19, 1991, you advertised, by variety name, uncertified seed of the Noble variety of oat in The Ohio Farm and Dairy.

Noble is a variety protected under the Plant Variety Protection Act. The certificate of Plant Variety Protection for this variety indicates that the seed shall not be sold by variety name unless it is certified seed. Under Federal law, Title V of the Federal Seed Act, it is illegal to sell or offer for sale or advertise Noble by variety name unless the seed is certified.

This warning is issued under Section 412 of the Federal Seed Act which provides that in certain circumstances a suitable warning may be issued instead of other action.

In addition to complying with the Federal Seed Act, persons handling seed of any protected variety are urged to exercise care to avoid infringing rights granted under Section III of the Plant Variety Protection Act.

Sincerely,

Stephen J. Hurst
Seed Marketing Specialist

We have information that on March 23, 1989, you advertised, by variety name, uncertified seed of the Noble variety of oat.

Noble is a variety protected under the Plant Variety Protection Act. The certificate of Plant Variety Protection for this variety indicates that the seed shall not be sold by variety name unless it is certified seed. Under Federal law, Title V of the Federal Seed Act, it is illegal to sell or offer for sale or advertise Noble oat by variety name unless the seed is certified.

This warning is issued under Section 412 of the Federal Seed Act which provides that in certain circumstances a suitable warning may be issued instead of other action.

In addition to complying with the Federal Seed Act, persons handling seed of any protected variety are urged to exercise care to avoid infringing rights granted under Section III of the Plant Variety Protection Act.

Sincerely,

Jonathan E. Farmer
Seed Marketing Specialist
